Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45-47, 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Hongo et al (6,921,466).

As to Claim 45, Hongo et al disclose a substrate positioner configured to position a semiconductor substrate in the processing system (514a and 514b); a sensor positioning system 542 configured to position one or more sensors including a first sensor relative to the substrate, the sensor positioning system comprising a positioning arm; and wherein the first sensor comprises an eddy current and an optical monitoring portion (col. 56, lines 52 through col. 57, line 57).

As to Claims 46, 47, and 49 the patent teaches the positioning arm positions the sensors at a predetermined distance from the substrate, and further including an eddy current detection system and a light detection system in communication with one of the sensors (see col. 56, lines 59-64), and further including the substrate.

Allowable Subject Matter

Claims 25-44, and 50 are allowed.

The following is an examiner's statement of reasons for allowance:

As to Claim 25, the prior art of record taken along or in combination, fails to disclose or render obvious a positioner configured to provide relative movement between the sensor and the wafer, the positioner comprising a positioning arm on which the sensor is disposed, in combination with the rest of the limitations of the claim.

The dependent Claims 26-44, and 50 are allowed by virtue of their dependence upon Claim 25.

Claim 48 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record taken along or in combination, fails to disclose or render obvious a switching system as presently claimed, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
